Subject: FW: EPA information about Seresto product complaint

The faucet won't turn off! Another seresto complaint. I hope this all leads to EPA removing this product and any like it!
(hey I can dream, right? 😊)

See below our complaint below under Comments.
We wish you all would do something about these collars so that no other pets get lost to these collars.

Comments: We have been reading about the Seresto dog collars causing deaths in some pets. We feel like this is what happened to our Sheltie. He worn these collars for several years. He was only 7 years old and in the last 6 months of his

life, he was not as healthy as before. But we could not find out why. Then on Dec. 8 around 6 pm, he started vomiting and would not stop.

He got so weak he could not stand. We called our vet and was on the way to the clinic with him, he had a seizure and died in my arms before We could get there. The vet checked him over and could not find a reason for his death.

He kept asking if he could have gotten into any poison, but he did not and could not. After reading all the news articles about other dogs dying from wearing these Seresto collars, we feel sure this is what happened to our dog also. We do not know any other way to submit a complaint or if this is the proper way to state the facts about our dog. Please let us know if there is something else that we can do to raise our concerns.

Hi Nick,

The summary table is helpful. Does the Incident Screening Team have a Sharepoint/Teams site? That would seem like a logical place to host it.

I am cc'ing Kimberly Smith who is the branch chief overseeing 6(a)(2) submissions.

Best,
Catherine

<image00001.png> Seresto Incidents.docx

Hi all,

Attached is an updated summary table of the Seresto pet incidents that we have received from NPIC.

I can continue to update this as new incidents come in. Do you want me to save this somewhere on the LAN or SharePoint so I do not need to keep sending out updates?

I hope you can do something about this soon because a lot of pets are dying. These adverse events may be rare, but with such wide use of this product, it still results in a lot of dead dogs and cats.

Nick

Hi Robert,

Per our meeting this afternoon, I will resubmit the 2018 and 2019 EPA Aggregate Reports to support your role in the congressional inquiry pertaining to spot-on products resulting from the recent Seresto collar issues.

Since all of the reports were submitted via hard copy, please let me know if I can simply forward them to you via e-mail (it will take more than one due to the size of the reports) since it is a lengthy process to prepare them for the CDX portal submission. Otherwise, just let me know if you require them via portal.

Please don't hesitate to let me know if I can be of any further assistance in this matter. Thank you.

Hi Leanne;

There is a the gap in Frontline aggregate incident reporting for 2018 and 2019. It look as if Frontline products changed hands from Merial to Boehringer Ingelheim between 2017 and 2020. Perhaps that is the reason for the gap in reporting. There is an upcoming Congressional inquiry looking into pet incidents after the USA Today report on Seresto collars.

Please contact me.

Take care,

Bob

Hi Robert,

Per our meeting this afternoon, I will resubmit the 2018 and 2019 EPA Aggregate Reports to support your role in the congressional inquiry pertaining to spot-on products resulting from the recent Seresto collar issues.

Since all of the reports were submitted via hard copy, please let me know if I can simply forward them to you via e-mail (it will take more than one due to the size of the reports) since it is a lengthy process to prepare them for the CDX portal submission. Otherwise, just let me know if you require them via portal.

Please don't hesitate to let me know if I can be of any further assistance in this matter. Thank you.

Hi LeAnn,

Anytime today works fine with me since I don't have any scheduled meetings. The EPA Administrator has asked for all pet incident reports for an upcoming congressional inquiry. I must have the pet data to him by Monday. My cell number is **Ex. 6 PP – personal phone**

Take care, Bob

Hi Robert,

Please let me know what the best time is to discuss the gap in aggregate reports with you so I can send you a meeting invitation. There is a possible report in question which is the 2Q18 aggregate report dated August 14, 2018. Could you check to see if you have that report from Tim Dotson? I'm looking forward to hearing from you soon.

Thanks.

Hi Leanne;

There is a the gap in Frontline aggregate incident reporting for 2018 and 2019. It look as if Frontline products changed hands from Merial to Boehringer Ingelheim between 2017 and 2020. Perhaps that is the reason for the gap in reporting. There is an upcoming Congressional inquiry looking into pet incidents after the USA Today report on Seresto collars.

Please contact me.

Take care,

Bob

Hi Nick,

The summary table is helpful. Does the Incident Screening Team have a Sharepoint/Teams site? That would seem like a logical place to host it.

I am cc'ing Kimberly Smith who is the branch chief overseeing 6(a)(2) submissions.

Best,
Catherine

Mastrota, Nicholas has shared a OneDrive for Business file with you. To view it, click the link below.

<image00001.png> Seresto Incidents.docx

Hi all,

Attached is an updated summary table of the Seresto pet incidents that we have received from NPIC.

I can continue to update this as new incidents come in. Do you want me to save this somewhere on the LAN or SharePoint so I do not need to keep sending out updates?

I hope you can do something about this soon because a lot of pets are dying. These adverse events may be rare, but with such wide use of this product, it still results in a lot of dead dogs and cats.

Nick

Hi Francine,

We haven't had incident report involving 65331-7 since 2014. Once a product has been canceled for 5-years a registrant no longer has to report incidents for the product. I'm not sure how to handle this submission.

Take care,

Bob

Subject: RE: Missing Frontline Aggregate Incident Reports -Congressional Inquiry

Hi Robert,

Please let me know what the best time is to discuss the gap in aggregate reports with you so I can send you a meeting invitation. There is a possible report in question which is the 2Q18 aggregate report dated August 14, 2018. Could you check to see if you have that report from Tim Dotson? I'm looking forward to hearing from you soon.

Thanks.

Subject: Missing Frontline Aggregate Incident Reports -Congressional Inquiry

CAUTION! Please do not click links or open attachments unless you recognize the sender, this email is from an External Sender (outside Boehringer-Ingelheim)

Hi Leanne;

There is a the gap in Frontline aggregate incident reporting for 2018 and 2019. It look as if Frontline products changed hands from Merial to Boehringer Ingelheim between 2017 and 2020. Perhaps that is the reason for the gap in reporting. There is an upcoming Congressional inquiry looking into pet incidents after the USA Today report on Seresto collars.

Please contact me.

Take care,

Bob

It's very weird. ☹️

I am still working on Seresto, and will start working on Administrator's request till Documentum is fixed.

Thank you,

Joyce

Hi Joyce,

Documentum gave me the same error message, so I can't email you the Frontline submissions. Between new pet incidents arriving and computer troubles we're not making headway with the Administrator's request.

Hi Bob,

I am still working on the Seresto incidents.

When I was trying to open BOEHRINGER incidents to see how they are, I got an error message that I can't access these files.

I already contacted EZTech this morning and it's been 2:30 hours.

While I am waiting for the response, can you open some of the submissions and send them to me?

At least I can work on some till the problem is solved.

Thank you,

Joyce

Hi Kim:

Joyce and I devoting all our time to retrieve the incident data ready for the Administrator and congress. Joyce I are able to open the cover letters from Boehringer and Ingelheim, but not the actual reports. I suspect Boehringer and Ingelheim has place some kind of lock on the reports. The OPP helpdesk is aware the situation.

We have many new Seresto incident reports. We are holding back on entering new Seresto reports to work from the pet product spreadsheet PRD provided us.

We'll most likely be fine. You'll be the first to know if were in over our heads.

Bob:

We actually have to have some information to produce to congress. I understand some of the constraints we are experiencing, but we will need to make some strides do to the sensitivity of the request. What information do you vs don't and specifically what are the constraints contributing to ISB not being able to provide the information, after they granted an extension. I will need to be able to explain this in a narrative form.

Pat, based on preliminary analysis, there are 18 PetSpotOn documents across the submissions. Per a requirement during the design phase, PetSpotOn's security permissions were more restrictive. There's an existing request/SCR open to adding a list of users to a PetSpotOn group that shall have access to these documents.

Hi Leann,

For tracking purposes quarterly aggregate incident reports need to be submitted via the CDS portal. I'm not permitted to accept incident data from registrant by email.

Take care,

Bob

Hi Robert,

Per our meeting this afternoon, I will resubmit the 2018 and 2019 EPA Aggregate Reports to support your role in the congressional inquiry pertaining to spot-on products resulting from the recent Seresto collar issues.

Since all of the reports were submitted via hard copy, please let me know if I can simply forward them to you via e-mail (it will take more than one due to the size of the reports) since it is a lengthy process to prepare them for the CDX portal submission. Otherwise, just let me know if you require them via portal.

Please don't hesitate to let me know if I can be of any further assistance in this matter. Thank you.

Hi LeAnn,

Anytime today works fine with me since I don't have any scheduled meetings. The EPA Administrator has asked for all pet incident reports for an upcoming congressional inquiry. I must have the pet data to him by Monday. My cell number is **Ex. 6 PP – personal phone**

Take care, Bob

Hi Robert,

Please let me know what the best time is to discuss the gap in aggregate reports with you so I can send you a meeting invitation. There is a possible report in question which is the 2Q18 aggregate report dated August 14, 2018. Could you check to see if you have that report from Tim Dotson? I'm looking forward to hearing from you soon.

Thanks.

Hi Leanne;

There is a the gap in Frontline aggregate incident reporting for 2018 and 2019. It look as if Frontline products changed hands from Merial to Boehringer Ingelheim between 2017 and 2020. Perhaps that is the reason for the gap in reporting. There is an upcoming Congressional inquiry looking into pet incidents after the USA Today report on Seresto collars.

Please contact me.

Take care,

Bob

Subject: 2018 EPA AE Quarterly Reports

Hi Bob,

Per our telecom this morning, attached are the pdfs for the quarterly reports for 2018; I'll send the 2019 in a separate e-mail since the files are very large. I left a couple of messages for Patrick to understand why you were unable to open all of the reports sent last week and determine what we must do differently, if necessary, so we can resubmit them again via the CDX portal.

Thanks.

Hi Leann,

Could please provide me with the CDX tracking number(s) after submitting the aggregate quarterly incident summaries for Frontline for the years 2018 and 2019?

Thanks,

Bob

Hi Leann,

For tracking purposes quarterly aggregate incident reports need to be submitted via the CDS portal. I'm not permitted to accept incident data from registrant by email.

Take care,

Bob

Subject: RE: Missing Frontline Aggregate Incident Reports -Congressional Inquiry

Hi Robert,

Per our meeting this afternoon, I will resubmit the 2018 and 2019 EPA Aggregate Reports to support your role in the congressional inquiry pertaining to spot-on products resulting from the recent Seresto collar issues.

Since all of the reports were submitted via hard copy, please let me know if I can simply forward them to you via e-mail (it will take more than one due to the size of the reports) since it is a lengthy process to prepare them for the CDX portal submission. Otherwise, just let me know if you require them via portal.

Please don't hesitate to let me know if I can be of any further assistance in this matter. Thank you.

Hi LeAnn,

Anytime today works fine with me since I don't have any scheduled meetings. The EPA Administrator has asked for all pet incident reports for an upcoming congressional inquiry. I must have the pet data to him by Monday. My cell number is Ex. 6 PP – personal phone

Take care, Bob

Hi Robert,

Please let me know what the best time is to discuss the gap in aggregate reports with you so I can send you a meeting invitation. There is a possible report in question which is the 2Q18 aggregate report dated August 14, 2018. Could you check to see if you have that report from Tim Dotson? I'm looking forward to hearing from you soon.

Thanks.

Hi Leanne;

There is a the gap in Frontline aggregate incident reporting for 2018 and 2019. It look as if Frontline products changed hands from Merial to Boehringer Ingelheim between 2017 and 2020. Perhaps that is the reason for the gap in reporting. There is an upcoming Congressional inquiry looking into pet incidents after the USA Today report on Seresto collars.

Please contact me.

Take care,

Bob

Hi Robert,

Attached are the remaining 2019 reports via e-mail. As you suggested earlier, the problem could very well be related to security issues on your end. However, since your EPA Administrator and possibly even Congress might need these records via the database, it is imperative that I hear back from your IT Team as soon as possible in order to be able to establish the problem in order to successfully resubmit these reports.

I left messages for Patrick and Kimberly today in hopes that we can discuss further. I can be reached at the following number at any time day or night: Ex. 6 PP – personal phone Thank you and I look forward to hearing from EPA soon.

Subject: 2018 EPA AE Quarterly Reports

Hi Bob,

Per our telecom this morning, attached are the pdfs for the quarterly reports for 2018; I'll send the 2019 in a separate e-mail since the files are very large. I left a couple of messages for Patrick to understand why you were unable to open all of the reports sent last week and determine what we must do differently, if necessary, so we can resubmit them again via the CDX portal.

Thanks.

Hi Leann,

Could please provide me with the CDX tracking number(s) after submitting the aggregate quarterly incident summaries for Frontline for the years 2018 and 2019?

Thanks,

Bob

Hi Leann,

For tracking purposes quarterly aggregate incident reports need to be submitted via the CDS portal. I'm not permitted to accept incident data from registrant by email.

Take care,

Bob

Hi Robert,

Per our meeting this afternoon, I will resubmit the 2018 and 2019 EPA Aggregate Reports to support your role in the congressional inquiry pertaining to spot-on products resulting from the recent Seresto collar issues.

Since all of the reports were submitted via hard copy, please let me know if I can simply forward them to you via e-mail (it will take more than one due to the size of the reports) since it is a lengthy process to prepare them for the CDX portal submission. Otherwise, just let me know if you require them via portal.

Please don't hesitate to let me know if I can be of any further assistance in this matter. Thank you.

Hi LeAnn,

Anytime today works fine with me since I don't have any scheduled meetings. The EPA Administrator has asked for all pet incident reports for an upcoming congressional inquiry. I must have the pet data to him by Monday. My cell number is Ex. 6 PP – personal phone

Take care, Bob

Hi Robert,

Please let me know what the best time is to discuss the gap in aggregate reports with you so I can send you a meeting invitation. There is a possible report in question which is the 2Q18 aggregate report dated August 14, 2018. Could you check to see if you have that report from Tim Dotson? I'm looking forward to hearing from you soon.

Thanks.

Hi Leanne;

There is a the gap in Frontline aggregate incident reporting for 2018 and 2019. It look as if Frontline products changed hands from Merial to Boehringer Ingelheim between 2017 and 2020. Perhaps that is the reason for the gap in reporting. There is an upcoming Congressional inquiry looking into pet incidents after the USA Today report on Seresto collars.

Please contact me.

Take care,

Bob

Subject: 2018 EPA AE Quarterly Reports

Hi Bob,

Per our telecom this morning, attached are the pdfs for the quarterly reports for 2018; I'll send the 2019 in a separate e-mail since the files are very large. I left a couple of messages for Patrick to understand why you were unable to open all of the reports sent last week and determine what we must do differently, if necessary, so we can resubmit them again via the CDX portal.

Thanks.

Hi Leann,

Could please provide me with the CDX tracking number(s) after submitting the aggregate quarterly incident summaries for Frontline for the years 2018 and 2019?

Thanks,

Bob

Robert A. Miller

Hi Leann,

For tracking purposes quarterly aggregate incident reports need to be submitted via the CDS portal. I'm not permitted to accept incident data from registrant by email.

Take care,

Bob

Hi Robert,

Per our meeting this afternoon, I will resubmit the 2018 and 2019 EPA Aggregate Reports to support your role in the congressional inquiry pertaining to spot-on products resulting from the recent Seresto collar issues.

Since all of the reports were submitted via hard copy, please let me know if I can simply forward them to you via e-mail (it will take more than one due to the size of the reports) since it is a lengthy process to prepare them for the CDX portal submission. Otherwise, just let me know if you require them via portal.

Please don't hesitate to let me know if I can be of any further assistance in this matter. Thank you.

Hi LeAnn,

Anytime today works fine with me since I don't have any scheduled meetings. The EPA Administrator has asked for all pet incident reports for an upcoming congressional inquiry. I must have the pet data to him by Monday. My cell number is Ex. 6 PP – personal phone

Take care, Bob

Hi Robert,

Please let me know what the best time is to discuss the gap in aggregate reports with you so I can send you a meeting invitation. There is a possible report in question which is the 2Q18 aggregate report dated August 14, 2018. Could you check to see if you have that report from Tim Dotson? I'm looking forward to hearing from you soon.

Thanks.

Hi Leanne;

There is a the gap in Frontline aggregate incident reporting for 2018 and 2019. It look as if Frontline products changed hands from Merial to Boehringer Ingelheim between 2017 and 2020. Perhaps that is the reason for the gap in reporting. There is an upcoming Congressional inquiry looking into pet incidents after the USA Today report on Seresto collars.

Please contact me.

Take care,

Bob

Subject: 2018 EPA AE Quarterly Reports

Hi Bob,

Per our telecom this morning, attached are the pdfs for the quarterly reports for 2018; I'll send the 2019 in a separate e-mail since the files are very large. I left a couple of messages for Patrick to understand why you were unable to open all of the reports sent last week and determine what we must do differently, if necessary, so we can resubmit them again via the CDX portal.

Thanks.

Hi Leann,

Could please provide me with the CDX tracking number(s) after submitting the aggregate quarterly incident summaries for Frontline for the years 2018 and 2019?

Thanks,

Bob

Hi Leann,

For tracking purposes quarterly aggregate incident reports need to be submitted via the CDS portal. I'm not permitted to accept incident data from registrant by email.

Take care,

Bob

Hi Robert,

Per our meeting this afternoon, I will resubmit the 2018 and 2019 EPA Aggregate Reports to support your role in the congressional inquiry pertaining to spot-on products resulting from the recent Seresto collar issues.

Since all of the reports were submitted via hard copy, please let me know if I can simply forward them to you via e-mail (it will take more than one due to the size of the reports) since it is a lengthy process to prepare them for the CDX portal submission. Otherwise, just let me know if you require them via portal.

Please don't hesitate to let me know if I can be of any further assistance in this matter. Thank you.

Hi LeAnn,

Anytime today works fine with me since I don't have any scheduled meetings. The EPA Administrator has asked for all pet incident reports for an upcoming congressional inquiry. I must have the pet data to him by Monday. My cell number is **Ex. 6 PP – personal phone**

Take care, Bob

Hi Robert,

Please let me know what the best time is to discuss the gap in aggregate reports with you so I can send you a meeting invitation. There is a possible report in question which is the 2Q18 aggregate report dated August 14, 2018. Could you check to see if you have that report from Tim Dotson? I'm looking forward to hearing from you soon.

Thanks.

Hi Leanne;

There is a the gap in Frontline aggregate incident reporting for 2018 and 2019. It look as if Frontline products changed hands from Merial to Boehringer Ingelheim between 2017 and 2020. Perhaps that is the reason for the gap in reporting. There is an upcoming Congressional inquiry looking into pet incidents after the USA Today report on Seresto collars.

Please contact me.

Take care,

Bob

Dear [Ex. 6 PP – personal name](#)

Thank you for writing the Environmental Protection Agency's Office of Pesticide Programs.

We are very sorry to hear about the loss of your beloved pet. The information that you shared has been reported to our adverse effects reporting branch.

EPA understands that pets are part of the family in many American households and the agency is committed to following the science and the law as we work to address this issue and pursue our mission. EPA always encourages consumers to read and follow all pesticide product labels. Product labels are the law and they are a vital part of EPA's efforts to ensure that consumers have the information they need to safely, legally, and effectively use EPA-approved pesticide products.

If you have questions about any pesticide-related topic, please call the [National Pesticide Information Center \(NPIC\)](#). NPIC is a great information resource service although it has no regulatory authority in relation to pesticides. You can reach NPIC at **1-800-858-7378** (8:00am - 12:00pm PST), or email at npic@ace.orst.edu.

The NPIC website features a [reporting database that veterinarians can use](#) to report adverse effects related to pesticide products. Please be aware this resource is only for veterinarians. Please consider encouraging your veterinarian to submit a report through this portal when they observe adverse reactions to pesticide products.

Please be sure to follow up with your veterinarian and provide the same information you provided to us to ensure the best diagnosis and follow-up care. The staff at the [National Pesticide Information Center](#) are specially trained in responding to pesticide exposure incidents, including those involving pets.

We hope you find this information useful. Please write us again if you have additional questions.

Kind Regards,

[Office of Pesticide Programs](#)

Subject: Seresto Flea Collar - Death of our Dog

Ms. Rust:

I contacted Michele Newton from FDACS Bureau of Inspection and was advised to reach out to you regarding our complaint about pesticide poisoning.

I am not exactly sure what information exactly you need from me. We purchased a Seresto Flea Collar from Amazon and put that on our Maltese (he was 9 years old weighing about 7 lbs). At first he just acted as though he was very unhappy with the collar on. We just assumed that he didn't like it, as a lot of pets don't. As the days we by we did notice that he was not as "spunky" as he normally was, but Eddie was a bit of a pouter when he didn't get his way. We continued to see him deteriorate, but we had some changes in the family that we thought were causing his lack of energy and continued "discontent". Then one morning I was getting ready for work and I noticed that Eddie was not steady on his feet, seeming disoriented. I took him outside and he just seemed to get worse, then he sorta went glassy eyed. I ran in the house with him and called my husband, who came home immediately. Eddie suffered a seizure that just seemed excruciating and then what appeared to be a massive stroke and he was gone. Dying in my husbands arms.

We just assumed that it was his age, and he had suffered a stroke. It was unsettling, as we just couldn't piece it all together in our heads. It wasn't until I read the Article in USA Today and saw the story on our local Channel 13 news about the Seresto Flea Collars that any of this started to make sense.

We had never used this type of flea treatment on any of our pets. We treat our yard and wash our pets with DAWN dishwashing detergent. We were told that Seresto was the best and we paid a lot of money for this collar.

My Husband has been impacted the most. Feeling that he did this to our dog, but I have reassured him that all he did was what he thought was the best thing for Eddie. The blame for Eddie's death rests in the hands of Seresto/Bayer/Elanco.

Subject: Deadly Seresto Collar

My story started in June 2020 when I got the Seresto flea/tick collar. Toward the end of August, Sammie (Shih Tzu) was getting sick and listless. You would pick him up and he would cry out in pain. I couldn't understand what was happening and took him to the Vets on 9/2/2020. Before leaving the house to go to the appointment, Sammie had a seizure in my arms. They thought he hurt his neck and said that was a spasm not a seizure. IMO and still is, that was a seizure. He had many of them. They gave him pain meds. They took blood, stool samples and a xray, perfectly healthy. By the way, no neck injury from the results of the xray. I took Sammie to another Vet but they didn't know I had this collar on him because I took it off only because he was in pain. Sammie lost a lot of weight, had to hand feed him and give him water through a syringe. He couldn't walk, kept falling. He lost most of his teeth and the ones that were still there were grounded down. The new Vet was so confused of what was going on. He would cry out the awful screeching cry. It was beyond awful. On October 1st, 2020, I had to come to the decision to put him down. I've had to put dogs down before but they were in their teens and at that age. Sammie was only 8 years old!! This has devastated me. The friend posted on FB that her 1 dog has a rash around his neck from the Seresto collar. Someone commented to take it off right away because it causes rashes, seizures and even death. That's when I started researching to see if that was true. That's when I saw a story about this guy whose dogs had the same symptoms. I contacted him because of the same situation I had to go through. I called my Vets and the Tech told me that's probably what happened to Sammie and would explain why he deteriorated so quickly and couldn't figure out what happened. Especially since they didn't know I used that collar. They don't sell that collar or any collar. I pray NO ONE has to EVER go through what I went through. This collar needs to be taken off the market. Feel free to email me if you need additional information. Thank you for reading. God Bless!!

Regards,

Ex. 6 Personal Privacy (PP)

Pat, based on preliminary analysis, there are 18 PetSpotOn documents across the submissions. Per a requirement during the design phase, PetSpotOn's security permissions were more restrictive. There's an existing request/SCR open to adding a list of users to a PetSpotOn group that shall have access to these documents.

Subject: RE: Missing Frontline Aggregate Incident Reports -Congressional Inquiry

Good Morning Robert,

Following are all the tracking numbers requested for the resubmission of all 2018 and 2019 Quarterly Aggregate Reports. Please don't hesitate to let me know if there is anything else you might need.

1Q18:

Sec3-6(a)(2)-000001: CDX_2021_003330
Sec3-6(a)(2)-000002: CDX_2021_003331
Sec3-6(a)(2)-000003: CDX_2021_003332
Sec3-6(a)(2)-000004: CDX_2021_003333
Sec3-6(a)(2)-000005: CDX_2021_003334
Sec3-6(a)(2)-000006: CDX_2021_003335

2Q18:

Sec3-6(a)(2)-000001: CDX_2021_003338
Sec3-6(a)(2)-000002: CDX_2021_003339

Sec3-6(a)(2)-000003: CDX_2021_003340
Sec3-6(a)(2)-000004: CDX_2021_003341
Sec3-6(a)(2)-000005: CDX_2021_003342
Sec3-6(a)(2)-000006: CDX_2021_003343

3Q18:

Sec3-6(a)(2)-000001: CDX_2021_003345
Sec3-6(a)(2)-000002: CDX_2021_003346
Sec3-6(a)(2)-000003: CDX_2021_003347
Sec3-6(a)(2)-000004: CDX_2021_003348
Sec3-6(a)(2)-000005: CDX_2021_003349
Sec3-6(a)(2)-000006: CDX_2021_003350

4Q18:

Sec3-6(a)(2)-000001: CDX_2021_003351
Sec3-6(a)(2)-000002: CDX_2021_003352
Sec3-6(a)(2)-000003: CDX_2021_003353

Hi Leann,

For tracking purposes quarterly aggregate incident reports need to be submitted via the CDS portal. I'm not permitted to accept incident data from registrant by email.

Take care,

Bob

Hi Robert,

Per our meeting this afternoon, I will resubmit the 2018 and 2019 EPA Aggregate Reports to support your role in the congressional inquiry pertaining to spot-on products resulting from the recent Seresto collar issues.

Since all of the reports were submitted via hard copy, please let me know if I can simply forward them to you via e-mail (it will take more than one due to the size of the reports) since it is a lengthy process to prepare them for the CDX portal submission. Otherwise, just let me know if you require them via portal.

Please don't hesitate to let me know if I can be of any further assistance in this matter. Thank you.

Hi LeAnn,

Anytime today works fine with me since I don't have any scheduled meetings. The EPA Administrator has asked for all pet incident reports for an upcoming congressional inquiry. I must have the pet data to him by Monday. My cell number is **Ex. 6 PP – personal phone**

Take care, Bob

Hi Robert,

Please let me know what the best time is to discuss the gap in aggregate reports with you so I can send you a meeting invitation. There is a possible report in question which is the 2Q18 aggregate report dated August 14, 2018. Could you check to see if you have that report from Tim Dotson? I'm looking forward to hearing from you soon.

Thanks.

Hi Leanne;

There is a the gap in Frontline aggregate incident reporting for 2018 and 2019. It look as if Frontline products changed hands from Merial to Boehringer Ingelheim between 2017 and 2020. Perhaps that is the reason for the gap in reporting. There is an upcoming Congressional inquiry looking into pet incidents after the USA Today report on Seresto collars.

Please contact me.

Take care,

Bob

Subject: FW: Flumethrin Question

Hi Nicole,

This is a question that is better for you to answer. I will respond if you like, but I may lose my cool. Why is Seresto even registered? At the very least Seresto should not be used on the endangered San Joaquin Kit Fox.

Take care,

Bob

Subject: Flumethrin Question

Hi Robert –

I was just this article about flumethrin and was wondering if you had any additional info or who the proper contact would be, <https://www.usatoday.com/story/news/investigations/2021/03/02/seresto-dog-cat-collars-found-harm-pets-humans-epa-records-show/4574753001/>.

We have been using Seresto collars on endangered San Joaquin kit foxes for the last 5 years (I actually did my dissertation on their safety and efficacy in preventing sarcoptic mange). This is a little concerning but I am not sure if

there is a lot of merit to the reports or not and how I could find out what was reported. In the cases of domestic dogs mortalities, it seems mortality occurred 2-3 months after the collar was put on. We have not had any problems in kit foxes but it is a little concerning.

Sincerely,

~*~

Subject: RE: Your Inquiry to EPA

Dear Jaime,
Here is the link to the FOIA response on Seresto:

<https://foiaonline.gov/foiaonline/action/public/submissionDetails?trackingNumber=EPA-2020-005216&type=request>

For some reason my Chrome stops responding every time I check download, but the way to get to it is to open the Aggregate Incident Summary Report.

Please contact us again if you have additional questions.

Warm Regards,
Mary Rust

Hi Mary –

I am receiving media inquiries about the use of flumethrin collars and I was writing to you again in hopes to find where I could view the reports of the adverse impacts being reported to the EPA about Seresto collars.

Any information you have on the matter would be greatly appreciated.

Sincerely,

~*~

Subject: RE: Your Inquiry to EPA

Thank you, Mary.

My main concern is that we currently use this product to prevent mange in an endangered population of kit foxes that could potentially be locally extirpated because of sarcoptic mange. We heavily researched the Seresto collars in 2015 – 2018 when we were studying their utility and never came across much in the published literature about these sorts of fatalities in domestic pets and, in fact, it seemed much safer than aflurolaner and fluralaner. We have not observed any adverse effects in the animals we studied.

I mostly wanted to inquire about the incidents that were reported in the USA today article and was wondering if that information was public. The article reported over 1,000 animal deaths and even more incidents and I wanted to know what those were. These products are used internationally and I have not come across similar reports in other countries. I also understand that incident reporting isn't necessarily screened and vetted for true cases of causality. I would like to have as much information as possible to make an informed decision as to whether or not we continue their use and unfortunately we do not have many other options.

Sincerely,

~*~

Warning: This email originated from outside of CDFW and should be treated with extra caution.

Dear Jaime,

Thank you for writing the Environmental Protection Agency's Office of Pesticide Programs.

We have forwarded the information you provided to our adverse effects reporting branch. Please be sure to follow up with your veterinarian and provide the same information you provided to us to ensure the best diagnosis and follow-up care. You might also want to contact the [National Pesticide Information Center](#), an EPA information-sharing partner that has staff who are specially trained in responding to pesticide exposure incidents, including those involving pets.

Also, we wanted to remind you that failure to follow EPA-approved label instructions on pesticide products is a violation of federal law. And, as indicated on all EPA-registered pesticide product labels, it can also be dangerous.

We hope you find this information useful. Please write us again if you have additional questions.

Kind Regards,

[Office of Pesticide Programs](#)

Subject: Flumethrin Question

Hi Robert –

I was just this article about flumethrin and was wondering if you had any additional info or who the proper contact would be,

<https://www.usatoday.com/story/news/investigations/2021/03/02/seresto-dog-cat-collars-found-harm-pets-humans-epa-records-show/4574753001/>.

We have been using Seresto collars on endangered San Joaquin kit foxes for the last 5 years (I actually did my dissertation on their safety and efficacy in preventing sarcoptic mange). This is a little concerning but I am not sure if there is a lot of merit to the reports or not and how I could find out what was reported. In the cases of domestic dogs mortalities, it seems mortality occurred 2-3 months after the collar was put on. We have not had any problems in kit foxes but it is a little concerning.

Sincerely,

~*~

Thanks.

It is crazy. Being a scientist, I am getting copied on their response to the issue and how they have been ignored for years. It's interesting to be able to "see" all of this play out from the comfort of my daughter's bedroom (LOL) 😊

Thank you also for sharing the researcher exemption. Makes sense.

Hope that you have a great day.

m

Thanks, Mary. I do appreciate what you're doing. It has to be awfully difficult, esp. when an issue gets sparked.

On the off-label use part of this story, it turns out that California's Research Authorization rules (i.e., the state's version of Experimental Use Permits) exempt academics from needing authorization. Here are the pertinent parts of their code.

CA DPR Research Authorization (RA)—California Code excerpts

A California Research Authorization is required for any experimental unregistered use of a pesticide in CA, regardless of size of the test plot. There are exceptions, which are noted below. (CCR 6260)

Exemptions from requirement of an RA: 1) RA is not required if the registrant operates the property on which the research is to be conducted; 2) Personnel employed by colleges and universities and engaged in pesticide research, are exempt from RA requirement if they are operating according to an established pesticide use and experimentation policy of the college or university. (CCR 6268)

Patti

Hi Patti,

Yes, I understand, and I know that was a lame 'template' response. Being a lowly ombudsperson, I have been waiting all day to hear what kind of response the senior leaders want to convey, but I have not heard. Still waiting to log in this morning. I knew you wanted a response quickly, so I sent what I could. I'm hoping that we will have some kind of statement to release soon.

Thanks,
Mary

Subject: RE: Your Inquiry to EPA

Thanks, Mary. I am a little concerned because I think his inquiry started with the adverse effects reporting branch (his note was to Robert Miller). This is a scientist who wants to understand the incident data and possible adverse effects from flumethrin exposure. Is there someone who can help him with those questions?

Regards,
Patti
